Profile

Frontend Developer with over 3 years of experience building scalable web and mobile applications using Angular and Ionic. Experienced in creating responsive user interfaces, integrating REST APIs, and developing real-time tracking dashboards. Strong focus on performance optimization, clean architecture, and delivering user-friendly products that support business operations.

Technical Skills

Frontend: Angular, Ionic, TypeScript, JavaScript (ES6), HTML5, CSS3, Bootstrap, Sass
Architecture: Component-Based Architecture, Responsive Design, REST API Integration
Tools: Git, Agile, Debugging, Code Reviews
Additional: Flutter

Professional Experience

Frontend Developer – Fuinco | Aug 2023 – Present | Cairo, Egypt

- Develop and maintain responsive web and mobile applications using Angular and Ionic.
- Build dashboards and management systems for real-time GPS tracking platforms.
- Integrate REST APIs for data visualization, trip tracking, and device monitoring.
- Improve application performance through code refactoring and optimized UI rendering.
- Work closely with backend engineers and product teams to deliver scalable features.

Projects

SKAI Website & Mobile Application

Project Description:
SKAI is an environmental intelligence platform that monitors sensors, climate conditions, water usage, and operational data through a unified analytics dashboard.

Role & Impact:

• Developed dashboard components for monitoring sensors and environmental data.
• Implemented tank level monitoring and flow meter data visualization.
• Built analytical reports to help users understand environmental performance.
Technologies: Angular, Ionic, TypeScript, REST API.

Sareb Platinum Tracking System

Project Description:
A GPS tracking platform used to monitor vehicles, drivers, and logistics operations in real time.

Role & Impact:
• Developed vehicle tracking dashboards with real-time data updates.
• Implemented fuel monitoring, generator status monitoring, and automation features.
• Built reports that help companies analyze fleet performance and trip history.
Technologies: Angular, Ionic, TypeScript, REST API.

Food & Drugs Logistics Tracking System

Project Description:
A logistics monitoring platform designed to track trucks transporting pharmaceuticals and food products while monitoring safety sensors.

Role & Impact:
• Implemented geofence alerts and overspeed notifications.
• Built dashboards that display truck status and sensor readings.
• Developed reporting tools for logistics analysis.
Technologies: Angular, Ionic, TypeScript, REST API.

Saudi Taxi Platform

Project Description:
A transportation platform that connects passengers with nearby taxi drivers and manages trip data.

Role & Impact:
• Developed driver and vehicle management modules.
• Implemented trip history tracking and reporting features.
• Built user interface components for booking and monitoring rides.
Technologies: Angular, Ionic, TypeScript, REST API.

Education

Bachelor of Computer Science – Shorouk Academy | 2019 – 2022

Flutter Diploma – Route Academy | 2022

Data Science & AI Diploma – AMIT | July 2026
